These Program Rules should be read in conjunction with the University's policies (http://www.adelaide.edu.au/policies).

Overview
This program examines environmental change and its effect on altering the world in which we live; its cities and suburbs, regional and rural landscapes, its natural heritage and biodiversity, and its significant political and economic implications. Students will learn about the causes of environmental change and develop strategies, policy, and planning skills to effectively manage environmental issues at local, national and global levels. Areas covered include climate change, managing our coasts and rivers, environmental management, population and migration, urban processes, biodiversity, conservation and sustainable development. Students will also have the opportunity to take part in an internship with an external organisation related to the environment in their final year of study.

The Bachelor of Environmental Policy and Management is an AQF Level 7 qualification with a standard full-time duration of 3 years.
